## PRICE LIST

# NOBLE NURSERY

Noble, Oklahoma

The following prices represent real tree and plant value direct from the grower. No agent's commission or middleman's profit to pay if you deal with us.

Our stock is fairly complete this season, though not extensive. Practically everything we offer is grown in our own nursery. Dutch Bulbs we import direct from Holland, and a few unimportant plants we supply from other nurseries.

Much of the nursery stock now being sold had to be started during the war, and there will not be enough to go around. Many items will be sold out early. For the past two years our stock was all sold out before the end of the planting season and late orders could not be filled. Avoid disappointment by placing orders at once.

Old Varieties—Red June, Burbank, Gold, Wickson, Forest Rose, Damson.

**New Hansen Hybrids**, originated by Prof. Neil E. Hansen of Brookings, South Dakota, introduced by a South Dakota nursery. First offered here by us five years ago, except Waneta, which is more recent. They are an extraordinary addition to American horticulture, being of good size, high quality and very prolific. They always bear very young. We have known several trees to ripen from one to three quarts of plums each at sixteen to eighteen months after planting. Listed approximately in order of ripening, covering four to six weeks. We sell them at same prices as other plums. Most nurseries ask more. Opatá, Sapa, Cheresota, Wachampa, Sansota, Eyama, Waneta, Ezaptan, Kaga, Hanska, Toka.

**APRICOT and Compass Cherry Plum**, same price as plums.

**CHERRY TREES**—One-year buds, 3 to 4 ft. and up, each 75c.

Early Richmond, Large Montmorency, Montmorency Ordinary.

**PEAR TREES**—1-year budded and 2-year grafted, 3 to 4 ft., 50c; 4 to 6 ft. and up, 75c;

**BLACKBERRIES**—After trying a number of varieties we found Early Harvest

the only one worth planting here. We grow a few acres of the berries for market and each season produce several thousand first class young plants in the nursery. Per 100, \$3.50; per 1,000, \$30.00.

**Raspberries and Dewberries**, same price.

**EVERBEARING STRAWBERRIES**, per 100, \$2.50.

**COMMON STRAWBERRIES**, per 100, \$1.00.

**DWARF JUNE BERRIES**, per dozen, \$1.50. This is the old fashioned service berry grown in great abundance on little bushes 2 to 3 feet high. Try them.

**THOBURN CURRANTS**—Now offered for the first time. Collected from western Oklahoma and Colorado by former Secretary of Agriculture J. B. Thoburn. The bushes resemble those of the wild black currant found all over this country, and are just as hardy here and much more prolific. Instead of black, they bear dull red, bright yellow, yellow with red stripe and greenish amber colored fruits of good quality, highly prized for pies, jellies and preserves. May be used either green or ripe and make a very acceptable substitute for gooseberries or for the eastern garden currants, none of which grow here with any marked degree of success. Per dozen, assorted, \$2.50.

**FIGS**—Not hardy here. Though killed back by freezing, they sprout from the stump and bear good fruit nearly every year; 1-2 ft., 25c; 2 to 3 ft., 50c each.

**RHUBARB OR PIE PLANT**—Mammoth seedless, divisions, \$1.50 per dozen, \$8.00 per 100; Linnaeus Seedlings, half price.

**SHADE TREES**—There is one best shade tree for this section. It grows naturally into an immense umbrella top and is never attacked by insects or disease, hence does not require either pruning or spraying. It grows on tight hard soils with half a chance, but under good conditions makes shade right now, growing a spread of seven to ten feet the first season. We refer to the Shade Mulberry, variously known as Non Bearing, Paper White, Barren, French or Male Mulberry, and are the largest growers of it in the state, though our supply of the trees ready for sale this season is limited. Eight to ten ft. trees, \$1.50; 6 to 8 ft., \$1.00; 4 to 6 ft., 75c; 3 to 4 ft., 50c each. Ask for price on smaller sizes, also Poplar, Maple, Elm and Catalpa Trees.
